The Pro Turf Advantage

Customer Benefit

3/8" stitch gauge and 2 1/4" turf pile height	Maximum amount of fiber, providing better traction and field longevity, and less rubber displacement and migration
Glued seams with 12" glue strip	Maximum seam integrity
3-part woven backing	Additional strength for maximum durability and tuft bind strength
Pro Design 42 oz. face weight	Customer feedback is that this provides best combination of playability and durability
100% MCCR™ Maximum Compactable Cryogenic Rubber infill	Cryogenic freezing process means rubber is cleaner, metal-free, and provides the maximum infill compaction and density
Yardage markers, hash marks, and all game lines included in quote	No hidden costs for essential game lines
Coloring for lines, logos, and end zone lettering inherent in fiber	No additional labor or costs associated with line painting
Trained installation crews travel site-to-site	No third-party, untrained employees; guarantees that our installation team has the most experience in the industry
Over 100 athletic field & 500 synthetic turf installations to date (including golf, airfields, etc.); PTS owner was also present at first major university installation	Provides unparalleled knowledge of the synthetic turf industry
Over 30 years excavation experience	Enables consultation on existing base to determine the extent of necessary base work as opposed to cookie-cutter specs; frequently results in significant savings
Patents on installation procedures and extensive testing performed on turf at an FAA testing facility	Tests include load bearing, friction, hazardous waste, and fire
Materials purchased direct from the manufacturers	Additional savings passed on to customer
No overselling	Enables PTS to give the utmost attention and care to each individual customer without compromising quality and integrity
Custom work as determined by each unique project	Climate, existing base and drainage, and special field requirements (such as usage, additional sport lines, etc.) are all incorporated
Minimal corporate overhead	Additional savings from low overhead passed on to customer
American-owned and operated	PTS is committed to customer satisfaction
2-year warranty on workmanship	Industry standard is 1-year
8-year manufacturer's warranty	Turf is purchased from the second-largest manufacturer of synthetic turf in the industry, providing 60% of all turf used in the US
\$2M liability insurance coverage	Per standard business practices
